Experience

March 2014 - present

Actie, Russia
actie.ru

CTO

Actie is a SaaS platform for creating promo actions across the country. It processed over 50 000 users over this period. Actie is a stable and scalable application built on Ruby on Rails and AngularJS.

July 2015 - December 2015

Thinknetica, Russia
thinknetica.com

Created an online course about AngularJS. It follows from basics up to production application.

April 2014 - March 2015

Flow Health Inc, US
flowhealth.com

Frontend lead

Frontend application with XMPP messaging. It uses javascript file API for cropping and scaling images in a browser.

August 2012 - March 2014

Brandy mint LLC, Russia
brandymint.com

Fullstack developer

clickavia.ru: code analysis and refactoring. I improved the Code Climate score from 1.9 up to 3.2 and increased the site response timing from 1000ms to 200ms.

About me

I've been working as a software engineer for 5 years. My first PL was Ruby. I work with git and use gitflow for all my projects. I work remotely most of the time and know how to organize a workflow in a remote team.

I love to learn. I know CS basics, algorithms and data structures, interested in big data and neural networks.

I like hiking and climbing.
